

9030P PIRTEK Fluid Power Glove

Protection You Can't Get Anywhere Else, Hands Down.

Proper Glove Care

When working a job, you can easily wash your gloves on site:

- Fill a bucket with warm water
- Add cleaning solution, we recommend a natural product
- Gentle hand wash only
- Line dry
- Do not bleach
- Do not iron
- Inspect gloves before use for tears, excessive wear and punctures
- Store in a clean, dry location

Note: We recommend that your PIRTEK Fluid Power Gloves be discarded immediately if visual signs of wear, such as holes and tears, are observed. Continuing to use a damaged glove can result in injury.
